

# Kupi gume, izaberi poklon!

## SONAX®

Kupovinom 2 gume izaberi  
SONAX poklon

Besplatna dostava na  
42 prodajna mjesta u BiH.

na prodajnim mjestima

pregledajte ponudu na [www.petrol.ba](http://www.petrol.ba)

Kupovinom  
4 ljetne gume  
MI ČASTIMO montažu.

Prilikom kupovine 4 ljetne  
gume, na Zlatnu Petrol  
karticu vršimo povrat od  
25 KM.

**PETROL**

Energija za život

Nova EU oznaka gume daje važne informacije o sigurnosti gume i njezinom uticaju na okoliš. Slično energetske oznaci s kućanskih aparata, EU oznaka gume olakšava usporedbu guma glede prianjanja na mokrim cestama, potrošnje goriva i razine buke. Pomoću donjih poveznica saznajte više.

#### Gdje se nalazi EU oznaka gume?

Od novembra 2012. sve nove gume moraju imati naljepnicu EU oznake gume. Ako ne možete pronaći oznaku na gumu, trebali biste pitati prodavača jer je dužan dati takvu informaciju.

## Objašnjenje oznaka u cjenovniku

### ISKORISTIVOST GORIVA

Jeste li znali da na gume otpada do 20 % potrošnje goriva vozila?

Izborom guma s visokim indeksom učinkovite potrošnje goriva dobićete više kilometara iz svog spremnika s manje emisija CO<sub>2</sub>.

#### KAKO GUMA ŠTEDI GORIVO?

Jednostavno rečeno, gume koje štede gorivo trebaju manje energije za okretanje. Guma koja se lako kotrlja treba manje goriva budući da se na trenje i grijanje troši manje energije. Možda ste čuli za gume s niskim otporom kotrljanju, što u stvari znači to isto.

#### KAKO SE OCJENJUJE UČINKOVITA POTROŠNJA GORIVA?

Učinkovita potrošnja goriva ocjenjuje se od A do G na skali u boji.

- A (zeleno)** = najviša ocjena učinkovite potrošnje goriva
- G (crvena)** = najniža ocjena učinkovite potrošnje goriva

Oznaka D ne koristi se za putnička vozila.

#### ZNAČENJE OCJENA

Razlika između ocjena A i G može značiti smanjenje potrošnje goriva i do 7,5 %. Drugim riječima, odabirom gume s oznakom A umjesto s oznakom G možete uštedjeti više od 6 litara goriva na svakih 1000 kilometara.\*

Uz prosječnu cijenu benzina od 2,40 KM po litru, dobiva se **ušteda troškova za više od cca. 600 KM u vijeku trajanja gume.\***

Ne zaboravite, smanjite i uticaj na okoliš!

#### ŠTO JOŠ UTIČE NA UČINKOVITU POTROŠNJU GORIVA?

Za optimalnu uštedu goriva gume moraju biti pravilno napuhane. Manji pritisak zraka u gumama povećava otpor kotrljanju i utiče na učinkovitost prianjanja na vlažnim podlogama. Težina vozila i vaš lični stil vožnje također su značajan faktor. Energetski učinkovita vožnja ili "eko vožnja" može značajno smanjiti potrošnju goriva.

*\*Na temelju prosječne potrošnje od 8 litara na 100 km i cijeni goriva od 2,40 KM po litru te prosječnoj kilometraži gume od 35.000 km. Prikazane oznake služe samo u informativne svrhe. Vrijednosti za određenu liniju/veličinu gume mogu varirati.*

# PRIANJANJE NA VLAŽNIM PODLOGAMA

Prianjanje na vlažnim podlogama je važan faktor koji treba uzeti u obzir pri izboru novih guma. Gume s visokom ocjenom prianjanja na mokrom zaustavit će se na kraćem putu na mokroj cesti kod potpunog kočenja.

## ŠTO JE PRIANJANJE NA MOKROM?

“Prianjanje na mokrom” sposobnost je gume da se drži uz cestu u mokrim uslovima. EU ocjena fokusira se na jedan aspekt prianjanja na vlažnim podlogama, a to je izdržljivost gume pri kočenju na mokrom.

## KAKO SE OCJENJUJE PRIANJANJE NA VLAŽNIM PODLOGAMA?

Prianjanje na vlažnim podlogama ocjenjuje se od A do F:

**A** ..... A = najviša ocjena  
**F** ..... F = najniža ocjena

Ocjene D i G ne koriste se za putničke automobile.

## ZNAČENJE OCJENA

U opasnim situacijama nekoliko metara može mnogo značiti. U putničkom vozilu koje koči punom snagom pri 80 km/h, gume s ocjenom A imat će zaustavni put kraći za 18 metara od guma s ocjenom F.\*\*

Napomena: uvijek poštujujte preporučene zaustavne puteve dok vozite.

*\*\* Izmjereno u skladu sa metodama ispitivanja postavljenim u Uredbi EC 1222/2009. Putevi zaustavljanja mogu se razlikovati zavisno od uslova na cesti i uticaja drugih faktora. Prikazane oznake služe samo u informativne svrhe. Vrijednosti za određenu liniju/veličinu gume mogu varirati.*

# BUKA

Gume doprinose količini buke koju stvara vozilo u prolazu. Odabir gume s dobrim indeksom buke smanjiće uticaj vaše vožnje na okolinu.

## ŠTO MJERE EU OCJENE GUME

EU ocjene mjere emisiju buke gume izvana u decibelima

## KLASA BUKE

Budući da mnogi ljudi nisu upoznati s vrijednostima decibela, prikazane su i klase buke. To svrstava gume u odnosu na najavljena evropska ograničenja buke guma.

 **1 crni val:** tihe gume (3 dB ili više ispod budućeg evropskog ograničenja)

 **2 crna vala:** umjereno tihe (između najavljenih evropskih ograničenja i 3 dB ispod ograničenja)

 **3 crna vala:** bučne gume (iznad najavljenih evropskih ograničenja)

## ZNAČENJE OCJENA

Razine u decibelima mjere se na logaritamskoj skali. Prema tome, povećanje od samo nekoliko decibela znači veliku razliku u razini buke. U stvari, razlika od 3 dB udvostručuje jačinu buke izvana koju stvara guma.

Pomislite koliko je hiljada automobila na našim cestama svakog dana. Kada bi svi birali gume s nižim indeksom buke, zamislite samo koliko bi naša naselja i gradovi bili tiši?
